One of the four buildings comprising the CBD Asset Strategy, the Governor Macquarie Tower (GMT) is a new CBD office building entirely fitted out for the NSW Government.

As Project Manager, APP were responsible for design and construction of fitout, including the telecommunications installation.

APP managed the tenants to ensure acceptance of new standards established in conjunction with the Client. The project had numerous telecommunications issues, including cutovers from existing to new premises which were managed by APP.

A sign of the success of this project was the smooth transition government agencies had into GMT, with little or no delays, during an election year.
