APP, with our strong track record Australia-wide in health and aged care projects, is assisting Echuca Regional Health to deliver a major redevelopment of its Health Service.

The first stage of this redevelopment was completed in 2003 at a cost of \$7.5m and comprises a new 45 bed aged residential care wing and refurbishment of the existing hostel bed Glanville Village. This precinct now provides much needed aged residential care services and is designed to allow for flexibility in accommodating the varying needs and patient classification likely to be encountered in a rural and ageing environment.

APP as Project Manager was responsible for all design documentation, appointment of contractor and subconsultants, budget and programme.

Stage Two (\$7.7m) of the redevelopment is currently underway and comprises construction of two new operating theatres, one day procedure unit, a new mortuary and CSSD. Construction will be completed late 2006.

The remaining stages of the redevelopment will include the redevelopment of Ward areas and Accident & Emergency. These components have been designed to the end of Design Development and are currently awaiting State government funding.

When completed, Echuca will have a seamless and totally integrated residential aged care and health facility that services over 40,000 people for the Echuca-Moama region.
